

## Wax Closet Gasket

### Specifications:

Furnish and install Water-Tite's Wax Gasket which is 100% pure wax gasket for setting all floor outlet toilet bowls. The gasket will form a water tight, gas tight and odor tight seal. Fits 3" and 4" waste lines. Available with plastic horn which extends the discharge opening to create a more positive seal and assure proper bowl alignment.

### Certifications:

Meets federal specification TT-P-1536A  
Buy American Act

### Instructions:

1. Be sure the wax ring is at room temperature (about 70°F). If wax ring is too cold a good seal may not be made or the toilet bowl could crack while making the installation.
2. With the toilet bowl upside down on a protective pad or blanket, place the wax ring around the discharge opening, extending plastic flange away from the bowl. Press firmly to assure adhesion when the toilet is inverted.
3. Using IPS Corporation's Soft Putty make a putty ring about 1 inch high around the outside rim of the toilet. This will make a seal between the toilet rim and the floor.
4. Carefully set toilet down on bolts and twist bowl slightly to spread wax and putty to make a tight seal. Tighten bolts carefully to prevent breaking the bowl.

| Product Code#                         | Model # | Product Description   | Units/Case |
