NEW

Classic One-Piece Flexible Waste & Overflow with Direct Drain

Multiple Sizes • Fully Assembled • Easy Installation

AB&A's new flexible one-piece, direct drain, schedule 40 waste and overflow gives installers the confidence that they will complete the job right the first time! This new one-piece assembly is conveniently offered in multiple pipe lengths to fit any tub, preassembled with no trimming required, and fewer joints to weld in the field for a faster, easier installation. The direct drain configuration is ideal for use in installations where baths are installed back to back, such as apartments, hotels and condos. The direct drain shoe is offered in one-piece flex full kits, a variety of half kits, and separately as an accessory.

The Classic overflow cover plate is slotted to provide greater drainage through the tub overflow. Installers can easily secure the overflow elbow, gasket and cover plate to the tub without the use of a screwdriver or screws.

To ensure proper size of one-piece FLEX is ordered, simply send us your tub manufacturer name and tub model number and IPS will do the rest:
plumbing@ipscorp.com or 800-888-8312

CLASSIC FEATURES

- 1 Push-on overflow cover plate easily secures to the overflow elbow for a snug fit against tub wall
- 2 High-flow capacity overflow cover plate allows water flow at approximately 7 gpm (typical tub valve = 5-6 gpm)
- 3 Tool-less installation
- 4 Extra (thin) gasket included for thick-walled tubs (e.g. marble)
