

Freeze Miser®

Outdoor Faucet Freeze Protection

The Smarter Way to Prevent Frozen Pipes

Unlike a traditional dripping method, the Freeze Miser™ senses the temperature of the water inside your faucet, allowing the water to release only when needed to help prevent freezing.

- **Temperature-Activated Design**—Begins operating only when water temperature reaches approximately 37°F (3°C).
- **Conserves Water**—Adjusts the release-rate automatically based on the fluctuating water temps, releasing the smallest amount of water needed to prevent freezing.
- **Extreme Weather Durability**—Provides protection even in extreme freezing conditions, reaching as low as -30°F.
- **No Electricity Required**—Operates mechanically without batteries or controls.
- **Easy to Install**—Attaches to most standard GHT faucets.

Available in two convenient tray packs

PRODUCT	DESCRIPTION	MODEL	UNITS/CASE
25201	Freeze Miser 1 pk Clamshell	6000-001	16
25202	Freeze Miser 2 pk Clamshell	6000-002	16
